EDUCATION

University of Missouri–Columbia

Expected Dec 2027

B.S. Data Science (Computer Science emphasis), Minor in Mathematics

- **GPA:** 3.76 cumulative | 3.90 major • **High Dean's List:** Spring 2025, Fall 2025, Spring 2026
- **Relevant Coursework:** Artificial Intelligence, Computational Intelligence, Linear Algebra, Calculus III, Discrete Math, Statistics, Data Visualization, OOP (Java)

RESEARCH EXPERIENCE

Research Assistant — Sinclair School of Nursing, University of Missouri

May 2026 – Present

- Preprocess ambient smart-home sensor data from dementia households for activity-of-daily-living (ADL) recognition
- Label daily activities in raw sensor event streams to build ground-truth data for transformer-based models

Undergraduate Research Fellow — Scalable Data Science Lab, University of Missouri

Aug 2025 – Dec 2025

- Trained and compared ML classifiers, including Random Forest, to distinguish tumor from normal tissue using DNA methylation data
- Presented a research poster at MU Fall Research Day; fellowship renewed each semester

HACKATHONS & COMPETITIONS

MU IDSI Hackathon: Dementia Speech Analyzer — 3rd Place of 21 teams

2026

- Built a tool that flags linguistic markers of dementia in speech, reporting evidence for and against decline
- Extracted transcripts and pause-timing features from DementiaNet audio with WhisperX; People's Choice nominee

ASA DataFest: When Life Gets in the Way — Best Visualization

2026

- Analyzed 7.7M patient encounters to measure how social barriers shape care; housing barriers tied to 364% more ER visits
- Estimated \$76M in excess ER costs from transport barriers alone; recommended transport-first triage and weekend clinics

TigerHacks: Truman On Call

2026

- Led the technical build of a working demo in under 36 hours: a first-aid training game with 10 campus emergency scenarios
- Measured live CPR compression rate from phone accelerometer, webcam, or Arduino sensor; logged data to a real-time dashboard

TigerVerse: SkillSight AR

2026

- Researched real-world accessibility barriers to shape the scenarios of an AR empathy experience built in Snap Lens Studio

EXPERIENCE

Peer Learning Tutor — College of Engineering, University of Missouri

Jan 2026 – Present

- Tutor engineering students in Pre-Calculus through Calculus III, Discrete Math, Linear Algebra, and STAT 4710

Content Manager & Project Coordinator — IT Community of Uzbekistan (Remote)

Jun 2023 – Jan 2025

- One of three social media managers; grew the LinkedIn group to 8,000+ members and total audience to 21,000+
- Coordinated the IT Community Roadshow across 9 cities, drawing 5,000+ attendees; managed logistics, speakers, and marketing

LEADERSHIP

Treasurer — Uzbek Students Organization (UZSO)

Jul 2026 – Present

- Manage budget and funding requests; ran 3 cultural events (incl. Uzbek Cultural Festival) and a souvenir fundraiser

Secretary — Claude Builder Club

Aug 2026 – Present

- Organize weekly meetings and build partnerships with other campus organizations

Founder — STEMReach Central Asia

2023

- Ran tech workshops for 95 girls (ages 13–18) with speakers from Meta and Amazon; every participant built her first website

SKILLS

Programming: Python, R, SQL, Java, JavaScript, TypeScript, C++ (basic)

ML & Data: pandas, NumPy, scikit-learn, PyTorch, TensorFlow, Hugging Face, LLM APIs, WhisperX

Visualization & Tools: matplotlib, seaborn, Plotly, Power BI, Git, Jupyter, AWS/GCP, Node.js

Languages: Uzbek (native), Russian (fluent), English (fluent)
